About This Content

Cardholder travels to Africa following a plea from an FBI-connected journalist who is desperate to help her friends in the Tanzanian Liberation Army. With people trying to kill him from the moment his plane lands, Cardholder must journey to the very foot of the mighty Mount Kilimanjaro to disrupt the plans of invaders experimenting with mind control.

Compensating:

John Dee
Two thousand years ago all this land belonged to the kingdom of Solomon. He was a great king and prophet, and... do you know what else?

Cardholder
Was he a...
... libertarian?

John Dee
Solomon was the greatest magician and exorcist of his age. In his Testament he writes how he cast out countless devils and demons, and battled with African and Egyptian spirits, Gods older than humanity and greater by far. His book was so terrible he buried it far from his cities and his wealth, with the mountain to watch over it.

Cardholder
Sounds like...

... you want the book.

... you need your head checked.

Inventory

- Destroy the Device
- No Civilian Casualties!

If you played chapter 1, this is basically more of the same. The story is good, the combat is "ok", everything else is not ok. More than half your play time will be loading screens. Frequently a level loads, you walk through it in under 30 seconds, and you get another loading screen. I'm not sure I ever spent more than 2 min on any one place so you literally are loading every 60-90 seconds, tops, and often much more often than that.

Tbh I'm not sure its worth \$5. I like the dialogue and the over all storyline but that's about it. Hopefully following chapters will address some of these other issues.
